

A Brief Overview

KRA Technical Ltd specialises in providing Low Carbon- low Energy heating solutions within the domestic housing, self -build / refurbishment and small commercial / social sector. We have many years of experience to help you choose the solution to best meet your needs and **reduce fuel poverty**. Our systems mean that you can `One - stop- shop` and know that all the hard selection work has already been done. We supply only the best equipment from U.K., Germany and Italy that is of the highest performance and quality.

Our affordable prices are designed to help get these types of systems into use and to help significantly reduce energy bills and fuel poverty. We work in association with leading manufacturers, but have negotiated terms more favourable than would be found direct. Clients using the equipment we supply can be assured not only of the latest best priced equipment available, but that these manufacturers provide full back up on the equipment, so no sleepless nights worrying `what if...?`

Heat Pumps

- **A60 series 65°C flow temp 9kw or 13kw**
- **Minimum output 10kw/55°C @ -20°C external temperature**
- **A60 series retro fit to Aluminium radiator systems at 50°C flow**
- **Designed and built in U.K. to work with British `Wet Snow`**
- **Simple Flow / Return No `F` gas certificate needed**
- **C.o.P up to 5.0 / average approx. 3.5 / 2.2@-15°C**
- **Low noise (≤49dba One of the quietest available)**
- **Tough Steel casing to withstand hard knocks**
- **240v power with soft start system**
- **Commercial systems also available up to 480kw/90°C/4,000lt DHW/day**

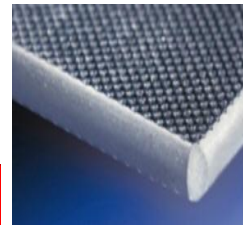

Thermal Store

- **Stainless Steel construction**
- **150lt normal & 215lt / 305lt Solar coil units**
- **Blending valve fitted / 3 Kw immersion fitted**
- **Continuous Hot water / Heating on demand**
- **25 Year Warranty on Stainless Steel cylinder**
- **Replaces existing DHW and Twin coil solar units**
- **2°C heat loss / 24hour**
- **Heat pump enhanced/ready**
- **No Legionella risk**
- **British made**

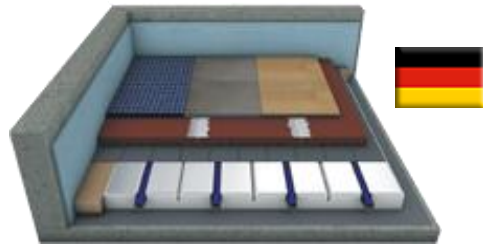

Solar P.V.

- **Exclusive East West orientation Pyramid systems**
- **East West 6% more efficient than South facing systems**
- **Integrated roof systems (Sits `in` not `on` Roof)**
- **Operate in part shade/damaged (Day4 System)**
- **German & Canadian Solar systems**
- **Complete systems and fittings**
- **Commercial systems available**
- **SAP kits for new developments (3 panel Micro inverter, integrated mounting)**
- **25 year warranties (Insurance backed- manufacturer supplied)**

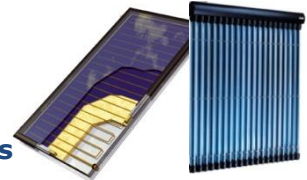

Under Floor Heating System

- Dry fit " No Screed"
- 50mm overall height
- New or refit
- Eco versions (Made from wood bark)
- Wet room floors
- Part E systems (Noise)
- Full bespoke design
- Quality German Design

Solar Thermal

- Flat plate or Evacuated Tube
- Top European brands
- Highly efficient
- Easy to install with all valves etc. integrated into 2 units
